

Goal to achieve

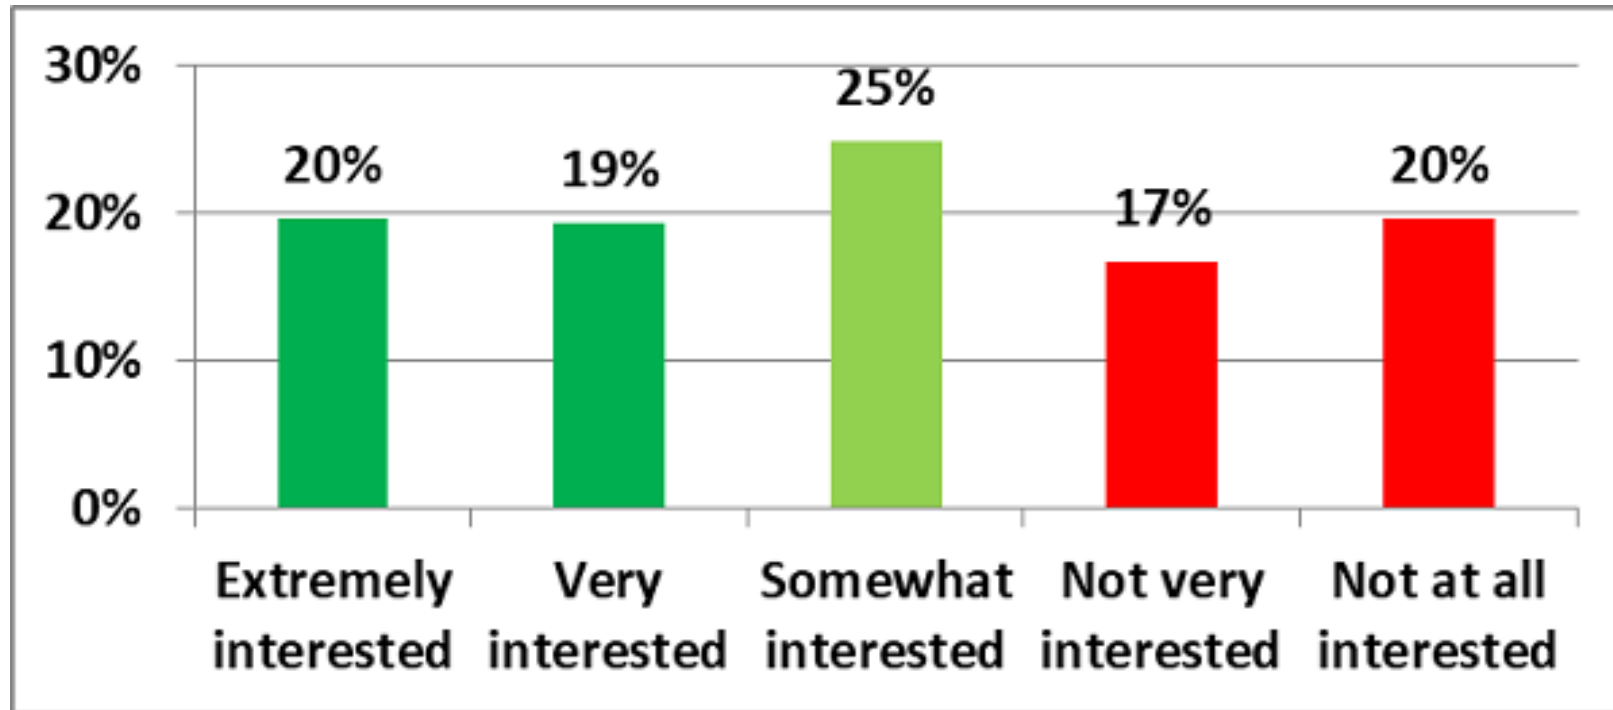

1. Gastro Hackathon

9. November 2019 | Salzburg, Austria AT

Team
Sup'Com

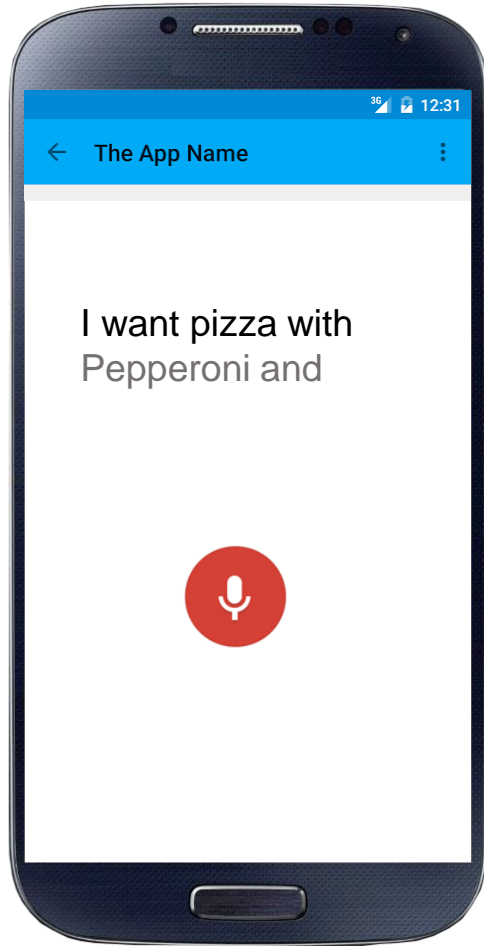

What do we really need ?

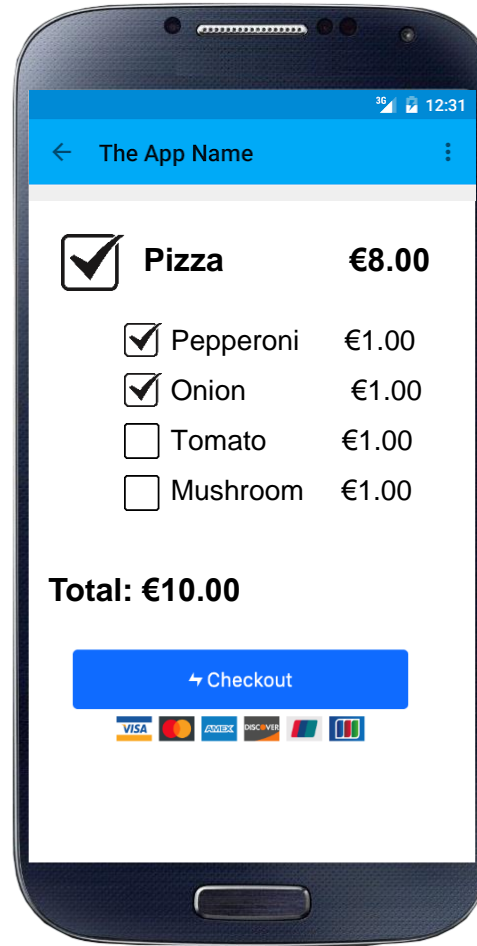

Source : The MDR Group and Progressive Business Insights.

How it works ?

Speech-to-text

Generation of the order

The customer picks the order and enjoys your delicious food.

Added value:

- **Creativity:** Easy to integrate into the existing applications.
- **Innovation:** Combining Speech Recognition with Named Entity Recognition
- **Impact:** Easy to use and time saver.

Demo?
